

PREVISEC

Incident Management

Ability to act

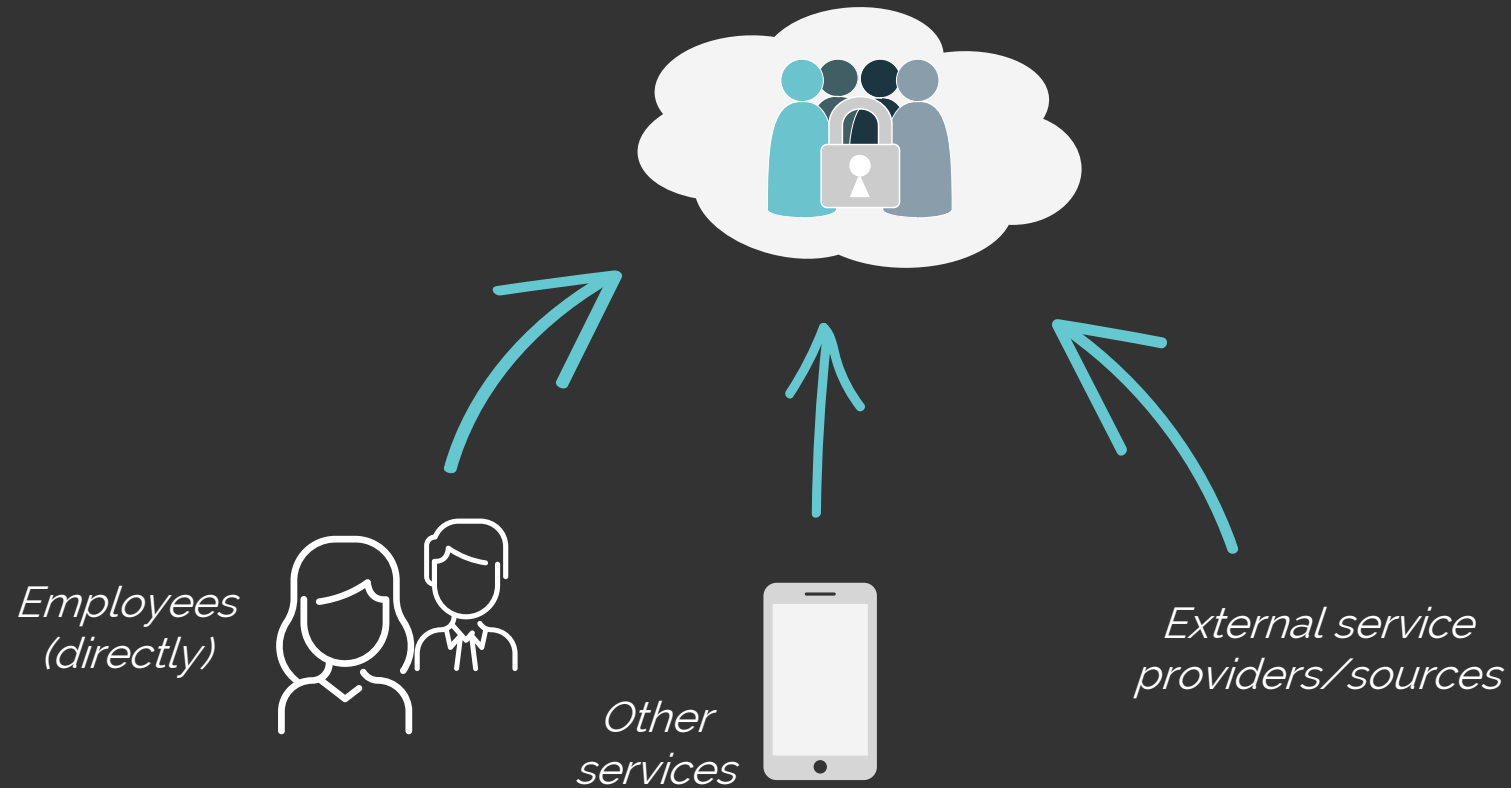

Ability to speak

Clear information situation

Awareness & Prevention

How PREVISEC supports your internal task force in implementing measures and dealing with the pandemic

Reporting

Cases: Infections, directed quarantine, isolation, suspected cases, restriction of operating hours or performance, (partial) lockdowns, etc. ...

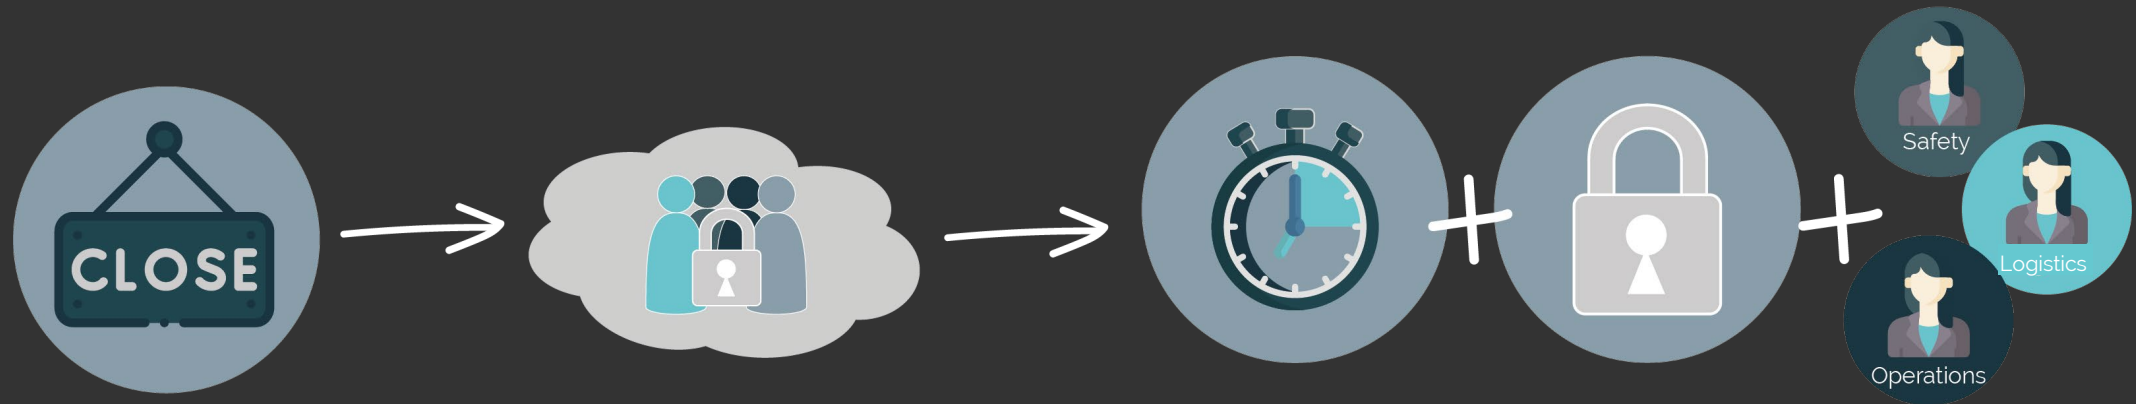

Communication & information

+ Implementation of measures & documentation

→ Reliably transforms approved procedures into documented actions throughout the organization, providing security

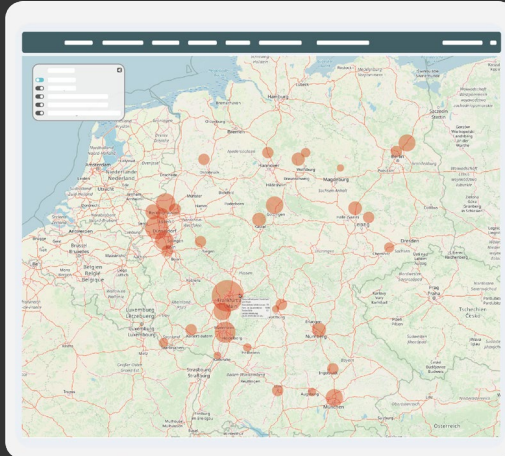

Ad hoc messages & reaction

Dynamically manage ad hoc operationally critical messages & communicate and respond quickly

E.g.: Endangerment of the ability to deliver, closure / restriction of the operation (ordered by authorities or for other reasons), requests from authorities, etc..

Situational picture & overview

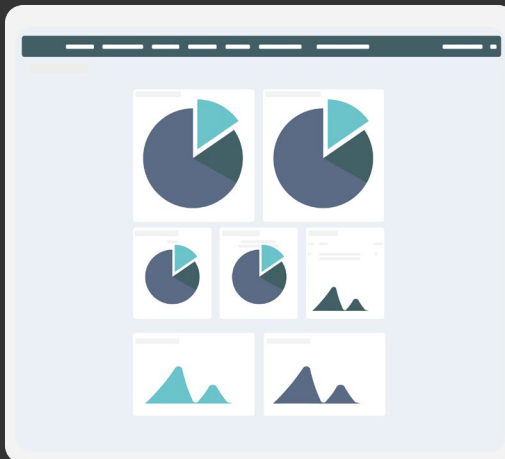

Global level:

- Overview of numbers (such as new infections, suspected cases, staff availability, etc.).
- Open topics/tasks with reference to structuring/guidelines.
- Identify difficulties/need for action

Management level:

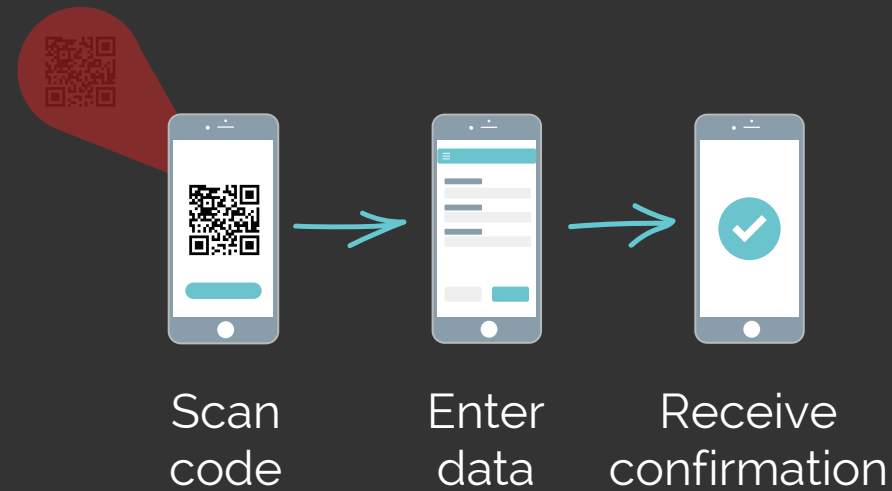

- Always keep open issues in view and resolve them
- Focus
- Secure implementation and documentation of legal and internal requirements

Individual level:

- Clarity on procedure / rules / behavior
- Transparency → Trust
- Minimized health risk
- Best possible contribution to company success
