

1.

Visual inspection of customers for wearing a mask when entering the store using a camera.

Clear communication:  
Management, guidance and information for customers. Example: traffic light system for the admission of customers with control of the above measures.

2.

Optionally, e.g. the body temperature can be determined or the customers can be counted.

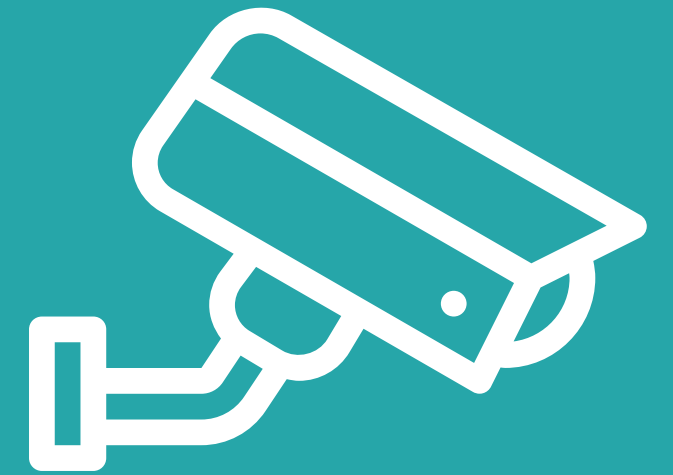

Link with PREVISEC:  
Each process is created and can be edited and analyzed. This way you keep the overview and are able to provide evidence at any time.

3.

If the mask requirement is not fulfilled, or if raised body temperature is measured, a defined reaction is automatically triggered.

4.

Flexible: Simply order cameras or sensors, or integrate the system with existing camera systems.

Low cost:  
**starting at 800€ / month**
